MirageBot

MirageBot is a customizable Battle.net chat bot. It can connect to over 300 different servers to query games, and games can also be queried through the bot. MirageBot is also highly customizable; you can enable nearly any feature you wish. Please visit miragenbot.com for full documentation. **More About MirageBot:** All downloads are available at [MirageBot Features](#): * Over 300 different servers and games can be queried through various methods * Chat channels, logging, and blacklisting capabilities * Over 50 different commands that are configurable through the bot * Built-in Auto-Chat which allows the bot to take input from you and do some things for you automatically * Designed to be compatible with the Battle.net website * Logging and Reporting system allows you to keep an eye on what your bot is doing * Replay system so you can see what you have done when you are offline * Written in Python 3.x, including support for Django, Tornado, and Flask. * Works on both Windows and Linux * Supports both Unity and Unreal Engine 4 platforms MirageBot is free to use for personal use. Commercial use and use for non-commercial purposes is the responsibility of the developer. Since MirageBot is written in Python, games that provide APIs such as Unreal engine games cannot be queried unless the game has been compiled for Python. **MirageBot Review:** [Battle.net Community Profile](#) Visit us at: [Community Profile](#) - Battle.net Instrumental in the creation of Battle.net As a transformative service, Battle.net not only expanded the reach of Blizzard's games, but it also changed the way players interacted with them. Now, almost a decade later, the service has found a new generation of fans and continues to evolve and grow. Come find us in your community as we present our [Community Profile](#) and look at how it has evolved. What's New in the?

* A Battle.net/ Diablo 3 client chat bot. * Supports an easy to use configuration GUI. * Multiple players can be managed from the GUI. * Expandable Network Profile system allows for different game/ connection profiles. * Allows for global resource management (mods/addons/ua/bots). * Allows for user friend system management. * Allows for the blacklisting of accounts. * Fully expandable to allow for more advanced features in the future. **Additional Information:** Installing MirageBot MirageBot is available for downloading via the [MirageBot GitHub releases page](#). MirageBot can be downloaded as a zip file, or a mirror can be set up. **Latest Discussion** MirageBot is a highly customizable Battle.net chat bot capable of loading multiple connections through an easy to use main window. These profiles can have a multitude of settings enabled which make them unique Give MirageBot a try to fully assess its capabilities! Download the MirageBot zip file. Make a folder where MirageBot can be stored, such as C:\MirageBot. Quit or disable Diablo 3. At the DOS prompt, change to the C:\MirageBot folder where you just downloaded MirageBot. Run the RunInstaller.exe as an administrator. Choose the first option to install Battle.net. Now choose the 1st option under the Battle.net installation location to update the game to the live version. Once installation is completed, Diablo 3 should now be accessible. **Configuring MirageBot** Once Diablo 3 is loaded up, you can open the quick start. Now you can either create a new profile or edit your existing one. Click on the [Configure Link](#), then click on the [Load a profile link](#). Click on the "Load" link, and the following will appear in the bottom left portion of the screen. You can either choose your own profile or create a new profile. **Editing Profile Settings** The default settings are good for most games. Allow both players to see your private messages: Create a profile for each person you play with. This will allow you to still be able to see each other's character information and messages in your chat window. **Enable the new player buff:** Allows you to ensure that your new players are fully leveled up with the latest content. **Enable host targeting:** Strictly for LAN games, host targeting allows you
