#### **My Personal Hidden Folder**

KeyMacro is a keyboard macro recorder. You can record a hotkey combo to activate almost anything at the press of a single key, including launching software, opening documents, accessing directories, and more! KeyMacro is a free command line utility that will record commands on your keyboard. You can save the current state of the keyboard and then launch the macro later. It can be used as a keyboard recorder, an aid to complex keyboard shortcuts, or as a special key for any software. You can use it as a keystroke logging and macro recorder. Keyboard

---

macro recorder is a great time saver for anyone who uses keyboard commands to get things done.

KeyMacro can be used to record one or more commands. You can also assign a special function to a key. You can bind key macros to any key you like, or even assign them to no keys at all! What's

new in this version: 1. The interface has been redesigned, so the user interface is more friendly and user-friendly. 2. The size of the keyboard window has been reduced, so you can use it for longer time. 3. The scrolling speed has been increased. 4. If you use the keyboard macro recorder and the computer is idle for a long time, the key down sound will not be played. Features:
