What's New In?

The NeroBurner application was designed to be a small tool that takes the hassle out of burning DVD-Videos. If you have Nero 6 installed and you have a VIDEO_TS folder containing VOB / IFO files, then NeroBurner lets you burn your DVDR in one click. You can enable shell integration (WindowsXP) for the automated deployment. If you're a Microsoft Windows power user, then you should have some kind of scripting expertise, so you can use the Nero Burner Shell Scripts to automate the deployment. Besides the normal tasks you can do with the NeroBurner application, you can also schedule your new DVD's to be created at a specific time with the Scheduler. For WindowsNT/2000 users: The NeroBurner application is integrated in the RedHat cd/dvd burner configuration tool r-cdburner. To install and run it type the following:
su[enter] ----- Features of NeroBurner By default, NeroBurner will automatically prepare your DVD to be burnt in one click. This is a small tool that takes the hassle out of burning DVD-Videos. The time before it is ready can be deactivate (optional), to let you start it at a time that you want. Besides the normal tasks you can do with the NeroBurner application, you can also schedule your new DVD's to be created at a specific time with the Scheduler. A built-in script that can be launched to run a scheduled task. The scheduler is not an embedded script, you will be requested to provide the scheduler scripts and the account you want to execute them. Two built-in engines: The Nero Audio Engine and the Nero Video Engine, that can be used for converting audio and video files, are installed in the next two NeroUpdate.ini files: NeroAudio.ini NeroVideo.ini Both need to be stored in the same folder as the NeroBurner application. You can disable the audio or video engine by using the option Engine=(engine) in the NeroBurner application. Have you ever been thinking about the possibility to burn an ISO file to a DVD-RW or CD-RW and only a short while later wanted to burn the ISO file to a DVD-RW or CD-RW?The NeroBurner application was designed to be a small tool that takes the hassle out of burning DVD-Videos. If you have Nero 6 installed and you have a VIDEO_TS folder containing VOB / IFO files, then NeroBurner lets you burn

your DVDR in one click. You can enable shell integration (WindowsXP) for the automated deployment. If you're a Microsoft Windows power user, then you should have some kind of scripting expertise, so you can use the Nero Burner Shell Scripts
