Annoying TalkBot for DC is a great chat trigger bot for Direct Connect Network (Direct Connect chats are managed by Google Talk). With annoying talkbot for Direct Connect you can automatically send a reply to a certain message on certain event. The chat triggers that can be used are: post (message with 2 clicks on the message), direct (message from one person to another), announce (message on mainchat, just visit

---

the site to see this type of message), message (message with only one click on the message). Annoying TalkBot for DC Features: Annoying TalkBot for DC is a standalone software for direct connect, it is not a feature of a server. Annoying TalkBot for DC is an excellent Add-On for the following apps:

1. Google Talk
2. XMPP Java

Annoying TalkBot for DC can be run either as a 64-bit standalone app or a 32-bit apps as well, but with compatibility problems.

Requirements: Annoying TalkBot

---

for DC can't be run on Windows XP (32-bit), it can be run in a XP virtual machine (Windows XP is the Host OS, Windows XP is being run under Virtual Box, for example). Installation: Annoying TalkBot for DC can be downloaded from our website. To run Annoying TalkBot for DC you need to double-click on "annoyingtalkbot.exe" file, after that a window will appear asking for a user name and a password. You can keep the first or the last name as name and password. You can also run the program by

---

saving the annoyingtalkbot.exe file to the desktop, and double-clicking the annoyingtalkbot.exe file. You can also run the program by double-clicking the annoyingtalkbot.ini file.

Updates: If you have just downloaded Annoying TalkBot for DC from our website, you will need to run the program as administrator and double click the annoyingtalkbot.exe file.

The program update automatically by itself or you can also check if a new version is available from our website by

---

clicking "Check for updates".  
About Annoying TalkBot for DC:  
Annoying TalkBot for DC is  
written in Visual Basic 6 for  
Direct Connect. Annoying

#### **What's New in the Annoying TalkBot For DC?**

With two lines of code, you can have a talk bot in your favourite chat room! This VB6 chat bot will look for only two words on each line: for instance, if a user writes in the main chat «Hi :)», the bot will send «Hi :) Hello!» to the room. This simple chatbot is

---

a VB 6 program that translates two words into a single word! This program is not a full fledged bot, just a translation bot. The program works in two modes: - mode 1: Conversations are initiated from main chat and the bot sends back the message; - mode 2: Conversations are initiated from main chat and then the bot tries to translate the message into a common bot language. It works perfectly on chats between three windows clients. The only bad point is that its not a mobile

---

client bot. To know how this program works, check the ini file (libs/net\_talkbot.ini) that you need to make it work! .. it is one of the rare VB 6 programs that can run as it is without any program. Requirements: You need a DC network chat room with direct connect enabled (defined as mainchat in libs/net\_talkbot.ini) A DC room that is able to receive messages from most of the rooms in the DC network Any other dc rooms are inactive, too .. If you want to use only one chat bot for many

---

rooms, the DC network must have the following configuration:  
room1 DC=X room2 DC=X  
room3 DC=X room4 DC=X  
room5 DC=X etc .. The rooms above must have a main chat handler defined that is compatible with the.NET DC library .. If you use rooms with the same DCs, you must define as main room the room with the highest DC How to run it : open the libs/net\_talkbot.ini file open the file with Notepad (please save it as libs/net\_talkbot.ini) add the following lines, and save

---

the file : [ROUTER.NET]  
disable\_Chat=3 if mainchat  
DC=Y no\_op Change DC=Y to  
the DC of your main chat room if  
you use other chat rooms in the  
same DC network Run annoybot.

---

**System Requirements For Annoying TalkBot For DC:**

**Minimum: OS: Microsoft Windows 8.1, Windows 7, Windows Vista
