The new model previews the design direction of the new 2011 Clubman. Over the past few years, BMW has experienced a renaissance in the success of their new subcompact model. With the Clubman reaching the market as the tenth generation, the sports car is experiencing a resurgence with the new 2011 Clubman. At the 2010 Paris Motor Show, BMW offered the first look at the upcoming model. "The new model previews the design direction of the new 2011 Clubman," said Matthias Ehrhardt, Chairman of the Board of Management of BMW AG. "Our compact-size sports cars are the perfect ambassadors for the premium segment, yet BMW has not only reinvented the Clubman but created a car that is both sporty and stylish, and one that best serves its owner." Among the design highlights of the new model are the new front and rear bumper designs, as well as a new roof. The front bumper features the typical BMW 3-pointed star which is also found on the new 330e coupe and convertible. The front bumper is no longer made out of stainless steel, but now of black carbon fiber which offers a more aerodynamic look. The rear bumper is now more prominent in its design with a contrasting black and white design and a black diffuser. The design is complemented with a two-tone, gloss black and matte silver rim surrounding the large single-lens tail lights. The new taillights are mounted on a new carbon-fiber tower. The roof is complemented with a new black carbon fiber fascia, which again is in contrast with the two-tone exterior. A wide section of black carbon fiber covers the front side windows and the rear side windows while the top area is made of black carbon fiber. The new model retains the contemporary interpretation of the compact sports car, with an aggressive stance and a slender body that is draped over a set of surprisingly short, wide wheels. The new model
