choroid plexus
calcification in a patient
with systemic lupus
erythematosus. We
describe a patient with
systemic lupus
erythematosus (SLE) in
whom intracisternal
calcification of the choroid
plexus was found. Choroid
plexus calcification is
usually associated with
ventriculitis and/or
arachnoiditis. We found no

evidence of recent bacterial infection. It is thought that calcification is associated with impaired tissue homeostasis and appears in the setting of a generalized calcium phosphate deposition. The choroid plexus is composed of fibroblast-like cells, and the cell walls are rich in glycosaminoglycan.

Calcification in SLE may therefore be more common than previously reported. Dietary exposure to polychlorinated dibenzo-p-dioxins (PCDDs), polychlorinated dibenzofurans (PCDFs) and coplanar polychlorinated biphenyls (PCBs) and serum lipid levels of the Chamorro population on Guam. Serum lipids, lipoproteins and

An FDA spokesman said the agency has proposed rules on cystic fibrosis and European Union rules on that topic are "in tandem." The move follows guidance from the U.S. President's Cystic Fibrosis Commission on some aspects of the evaluation-to-market decisionmaking process. "Some of the implementation rules in the draft guidance are designed to align
