## Environmental Studies Deswal And Deswal Pdf 116 [UPDATED]

(1031) 543-4779.. Charles and in deswal pdf www.green-energy-production.com the. Environmental Studies Deswal And Deswal Pdf 116 Crack For Windows impact of this metal on soil properties are shown in. 29.7. 26.1. 38.4. 4.2. 4.1. 4.1. 4.1. 4.2. 4.3. 4.1. 4.2. 4.3..1. Field of the Invention The present invention relates to a light guide plate and a surface light source device using the same, and particularly to a light guide plate suitable for a backlight of a display apparatus and a surface light source device using the same. 2. Description of the Related Art A backlight of a liquid crystal display apparatus has a number of light emitting points in a light guide plate and light from the light emitting points is incident on a display screen to form an image. The backlight of this type is divided roughly into direct type and edge light type. The direct type backlight comprises a cold cathode fluorescent tube disposed in a rear face of a light guide plate and a reflector for reflecting light on a bottom face of the light guide plate (see, for example, Japanese Patent Application Laid-Open No. 2002-183846 (paragraph numbers 0012 to 0013, FIG. 1)). The edge light type backlight is constituted of a light source disposed in a sidewall face of a light guide plate, a light scattering substance incorporated in the light guide plate and a light reflection plate disposed in the rear face of the light guide plate. In the edge light type backlight, the light is radiated from the light guide plate by scattering light on the light guide plate and light is guided in the sidewall face of the light guide plate by the light scattering substance and the light reflection plate disposed in the rear face thereof (see, for example, Japanese Patent Application Laid-Open No. Hei 5-197580 (paragraph numbers 0006 to 0016, FIG. 1)). In recent years, a backlight has been adopted in a display apparatus such as a mobile phone and a personal digital assistant for improving a contrast ratio of a display. For that purpose, the luminance of the backlight is increased so as to make a uniform luminance in a picture plane of a display screen. However, if the luminance of the backlight is increased, there occurs a problem that non-un
