"One of the most unique VR experiences available on Oculus and GearVR. You can throw the VR games directly at the tv or wall and control the game in a fun, quirky way." Do you ever ask yourself if a self-driving car would be a good idea? Or maybe what would happen if people could post their dreams and thoughts on the internet? It sounds like it would be like a video game: all fun and games, but the internet already exists, so why would anyone want to do that? Well, the truth is that using neural networks to process big data, self-driving cars could be the future of the internet. Learn more about with our virtual reality streetview: How would you feel if you were randomly arrested by police and needed to learn a new language? "I could speak the language of magic, and I can put myself inside the minds of others. This will help me adapt to any situation, unlike learning a new language. I could find out where you work, and target you with poison." Deep Dream has taken over the

she's still a light sleeper. When she wakes up he barely seems to pay her any attention. Clickmonster:Re: Yeah, he IS a scrub. You got that right! I think he's a hooker with a college degree. He's an accountant and couldn't even keep his high school GPA higher. We were too small for him in high school. Everyone of our friends could throw a ball further than him, including senior varsity players.

Clickmonster:Re: Good stuff The boy has freakish agility for that size...so he can thread the needle on short passes and he never misses. If he's not the best all-around athlete in the entire weight class this day and age, my Dad says he's certainly the most gifted. Alas, he never won a title at any level. He's the first to admit that he's intelligent, but he's foolish. According to his dad, he's such a ne'er-do-well that he just sort of floats around and picks up the smallest scraps of trash. Yet I swear he's one of the worst hoopers I've ever seen.

Clickmonster:Re: Bad Carries On The thing that really pisses me off is that he's not the best trash talker by any stretch of the imagination. When he gets on the turf he'll mumble something. I mean, you hear announcers talk about some of these huge monsters as if they're 6'6", say the names, make hilarious insinuations about how they eat people. Color Blood, combines a number of different genres, including Action, Adventure, Puzzle and Simulation, to create a fast-paced, turn-based, 2D Strategy Action Game, full of originality, humor, and detail. Our first game on Steam, Color Blood is a tribute to the great classics in the genre. The

objective is simple: survive until the end of the game. You play as a plumber by the name of "Lord Turd", who finally got the call to become a hero and save his town. Can you free the people from their prison, and will you be able to leave before you get kidnapped by space pirates and forced to fight your way back home? The campaign mode contains the main story, along with a sandbox mode where you can explore the world. The sandbox mode also has a dedicated level editor that lets you design your own levels and share them with friends. There are also more than 70 playable characters to unlock and a dedicated stage editor to get creative. The core gameplay consists of fighting enemies along the way using your abilities, as well as using items and weapons you've collected along the way. Color Blood is an action game, but does not force you to play it like one. You can take as much time as you need to figure out the game's mechanic and style. We think that's important because the genre is already filled with so many clones that only follow a pre-programmed design. Color Blood has a lot of personality packed into every square pixel. Throughout the game you'll meet all sorts of characters who will eventually become your new friends, and their stories unfold in the sandbox mode. Join them in their many adventures through a series of carefully crafted stages and in-game dialogues. We've included references from some of the great games of the genre to recreate the feeling of the great classics, and have included originality and humor to keep the game from becoming too serious. We hope you will enjoy our first Steam game as much as we enjoyed making it!

Features: Multiplayer Mode: Color Blood can be played online with up to 8 players in coop (local) or online in competitive and casual matches. Color Blood Multiplayer features: - X-Box and Steam controller support - Gamepad Support: Play alone or

with a friend, in coop mode, and in competitive and casual matches. Press the right trigger and aim with the thumbsticks

Synthesis, structures, and reactivity of lithium arylcyclopropenes. Ethene insertion and hydroboration of dimeric homoborane anions. Dihydrogen elimination from arylcyclopropene lithium reagents $\text{NMe}_2\text{CpCH}=\text{CH}_2\text{Li}$ (1) and $(t)\text{Bu}_2\text{CpCH}=\text{CH}_2\text{Li}$ (2) results in highly reactive dimeric or "sprogide-like" metal hydrides. The reactivity of 1 towards H_2 and ethene is assessed by forming $[\text{Ph}_3\text{C}][1]$, which is reduced by ethene to $[\text{Ph}_3\text{C}]_2$ and Li_2 (1 ethene exchange by H_2), and also by reacting 1 with diborane to form $[\text{Ph}_3\text{C}][\text{HBpin}]_2$ and LiBpin (2 ethene exchange by H). In contrast, 2 reacts only slowly with H_2 and yields $[\text{Ph}_3\text{C}][\text{HBpin}]_2$ as the major product. Cyclopropenyl boranes $[\text{Ph}_3\text{C}][\text{H}11\text{-R-Bpin}]$ (4 a-d: R = Bpin, Cl, H, Me) react with ethene to give products of ethene insertion into the $[\text{Ph}_3\text{C}]$ -cage and hydroboration of the Cp ligand. In the case of $[\text{Ph}_3\text{C}]_2\text{HBpin}$ (4 e), hydroboration of the Cp ligand occurs through a two-step pathway involving initial formation of the transient $[\text{Ph}_3\text{C}]\text{Bpin}_2$ species.
