Northern Tales is a multiplayer, innovative, strategy game with a futuristic setting, playing in real-time. The game is offered in 2 different seasons: Winter and Spring. In Winter, the snow covers the land and many of the creatures are afraid of the ice and cold, but they still leave their footprints on it to guide you on your quest. In Spring, the land is covered in thick grass and many plants are starting to bloom, as you encounter more flowers and fruits. The game features: -Games that are played in real-time -Interactive map, showing what dangers you have to face in order to reach your goal -Upgradeable combat vehicle -Weapons that can be gained by defeating other players (shared loot) -A powerful weapon, that when you'll get it, will help you defeat the bosses, gather more loot and reach the next level. -Stamina and health are a more important factor when being on foot. -The player makes his way up north to defeat the leader of the invasion force (The protagonist) and stop the threat of evil. -Many obstacles and the "Death" event are part of the way, as well as a multi-level platform puzzle game. -Fantasy and Sci-Fi environment, based on medieval and modern times, with a sense of humor and ironicality. -Fun and addictive gameplay, that keeps you playing with your friends, for hours, on end. Enjoy! 1 player (dual-screen/single player) Screenshots Get the official game trailer here: Get the full-game description here: Ask HN: Why does HN need an "ask a question" link? - shawnz Why does this need to be a separate link from the submit button (or worse, a second submit button)?I understand if it is a small UI change, but if it is changing the way a user is expecting to submit a comment - that's a big deal.In other words, if you create a new way of submitting a comment, why not just include a "submit" button that says "submit", but maybe applies a class to it such as "disabled" or "loading"

Skull Seeker Features Key:

Authentic Arcade gameplay in 2017
Real track locations in collaboration with the sanctioning body
In-game graphics designed to match the 2015-2016 season

Key Game Features:

Authenticity: The real deal. The authentic, true-to-life experience of Indy Pro and its wide array of exciting challenges has been recreated, from real-time race car control to historically-accurate track conditions. **Content**: Lots of gold to be won. With more cars, drivers and track locations than ever before, Indy Pro players can lead an unprecedented eight championship hats. Players can take a ride on 11 different tracks from old to new, and move forward in-game with the same Indy Pro credits. So they can develop their cars, drivers and strategies along the way, all on their way to becoming the Indy Pro 22 Champions. **Quality**: There's a lot to witness. Driven by the power of

the Unreal Engine, Indy Pro '22 delivers some of the most photorealistic content any racing game has ever seen. Day and night cycle, full-motion video, and detailed reflections — all ready for the winner. **Passion**: EA SPORTS is the master of the arcade racers. So why do Indy Pro players race their cars as though no expense had been spared? And why do drivers push the limits of their vehicles? The answer lies in each Indy Pro driver's unique personality -- who they are, what they drive and why they do it all. Whether it's a ground-pounding stock car, a screaming supercar or a test bed that handles at well above 200 mph, each brand and type of car is in the cards. Players can prove it as they season in the Indy Pro online leagues. **Drivers**: Drive some of the most thrilling Indy Pro cars. Sticking with EA SPORTS' traditional formula for the first time, the number of Indy Pro 22 drivers is the highest in the series' history. Players can drive the cars of their dreams, including the all-new 2017 Gen-6 flagship Car of the Year, the stunning Ferrari 488 Pista. **Matchmaking**: Race anywhere. With Indy Pro '22, the 2017 brand-new authentic gameplay gives players full control over the experience. New for Indy Pro '22 is the ability to

3D arcade kart racing mini-game. Music: "Frenzy" by Half The Sky -This game is developed with Unity in C# and for PC using Windows 10 -If you like the game you can support me and give your feedback about your experience in purchasing the game The game is now ready to be published in Steam. I post about what I have done, so for me it is a good way to promote the game. I have some ideas of things that can be improved or added to the game, if you want to contact me for one of these ideas, please mail me at: [] What's new is that the button to pause the game is now to the left of the game, that was added later on because of an iPad dev and now is not required anymore. Also - change of graphics of the track, to make it possible to read the track number and distance (ex: Karting Grand Prix of Ponti). Also, in order to reduce the size of the game, I remove the graphics from the race option, the main menu and the options menu. This is a good type of game for me because the game has a tendency to display better in certain devices. Of course, the game also works perfectly in other devices. And what's even better, when you play it in your machine you'll have fun, and when you play it in an iPad or an iPhone or in a bigger screen you'll feel as if you were at the arcade. [* All characters in the game are fictional*] How to play: Press "Z" to start the car and avoid collisions, while collecting points. How to connect the joystick: - On the right, the stick "left" "right" - On the bottom, "Up" "Down" and (in the middle) "Ok". Joystick movement does not have an impact on the game, only pressing "Ok" does. Please, help me improve the game, since it is just the beginning of my career, I am a beginner. The game starts with limited value, as you have to buy parts in order to improve your car. You will not be charged. The game has two seasons, and during the first season you will lose some of your teams, so you need to buy new parts to compete in the second season. When you complete the season, then c9d1549cdd

What's new in Skull Seeker:

Jumps!!! 2017-02-10 22:30:53 - GameTun4ed#2054 By 10:30AM I'd gone around every tomb except the first...but nothing. I return to my first tomb and look around...and I see the lich spawn holding the area he had created! I open my treasure box and freeze. "Uh Oh! The lich has spawned his undead minions. The lich needs to be defeated, quickly." I leave the area and open up the world map...and look at the map...and I see his location...and grab some of those yellow eggs...and at

the map...and I see he's only a few blocks away? I grab a 400 food potion, speed up my boots, and run over. I get there, and he's gone...and I see blood on the stone floor where he was...but next to the blood is an egg...and inside is a baby...and he's now dead. yup. I collect it and out I go. For my next stop..check out the third tomb. But this tomb is a REALLY PAINFUL ONE. You're not gonna like what I'm about to show you...But what you're gonna find in there is amazing! I'm still in the second level, and I guess the boss must have spawned? SIGH. I take my best attempt at maybe of using my moai and try to fly over and around his mummies. I quickly fall back to the ground, but I see a mummy nearby that I haven't been able to take out with my babyflesh yet (since I'm still on my first cup of strenght I haven't been able to use any other mummies yet). So, I open my treasure box, still holding my 400 food potion, and I fish out my healing potion. I drink it. The first five mummies drop dead and I run over to the mummy near me. I spawn a red godstone, grab it, and eat it and drink my blue powered up food potion. I tap my right mouse button and use the air control wheel to jump and run over to the mummy on my left, grabbing his mummy as I go. I jump right on him and eat him and drink my blue powered-up blue food potion. I jump right on the witch down the hill and grab her mummy, eating her and drinking her blue potion. I run to my place in the room, which I don't know yet, because it
