Mastercam Online is the largest software provider in the CNC industry. Mastercam's specific programming software packages are.The impact of work and family stress on eating behaviors and weight control practices in full-time working women and men. The purpose of this study was to investigate the role of work and family stress in the development and maintenance of dietary restraint and disinhibited eating. Findings from this study with an ethnically diverse sample of 251 females and 153 males who completed a questionnaire battery on work and family stress, restrained eating, disinhibited eating, and weight control practices are reported. Work-family conflict and work role strain were inversely related to restrained eating and directly related to disinhibited eating. Thus, the more conflict and strain, the less restrained and more disinhibited a person is. No significant main effects of gender or gender by stress interactions were found. Finally, a complex pattern emerged indicating a two-way relationship between stress and gender: stress effects were more prominent in males than females. We discuss the theoretical and clinical implications of these findings.Image Gallery The Rothschild building is the first building designed by Gustave Eiffel. This majestic architectural beauty is justifiably regarded as the symbol of the city. It is one of the most important symbols of Paris, together with the Eiffel tower. The tower, which was the first steel monument in the world,...
