Q: Where can I get an official Java SE 6 for Windows? This has been asked before on SE, but to prevent newbies wandering in here because it has been answered, I want to make sure that I get an official Java6 for Windows right. Here's my situation: I am an advanced C/C++ developer with little or no experience with Java (besides a short stint using it to help code a GUI to a commercial application). My computer is an AMD 1.6 GHz with 1GB RAM and it runs Windows XP. The company I work at is moving all our production apps (there are several) from a Windows 2000 machine to a Windows 2008 machine, and Java is the only thing that is not supported on Windows 2008. As such, we'll get a new machine with Windows 2008. I am trying to figure out what I need to do in order to get a copy of Java 6 (if anyone knows). The Java site won't tell me where to download the current version from because we don't support Java 5.3 on Windows 2008. If I can't get Java6 for Windows, then I'm not going to be able to even test my application on the new machine, so I am trying to figure out what I need. If I do the JRE/JDK e9d1549cdd

On the hunt to claim the legendary treasure with enemies on every side, one false step and the heroes will also meet the lost expedition's deadly fate! Legend of the Burning Star is a Pathfinder Second Edition adventure for 10th-level characters set in the Kingdom of Foere, the Grand Duchy of Reme, the Grey Citadel, and beyond in the Lost Lands Campaign Setting. This rich and exciting world 20 years in the making has been home to dozens of adventures from Necromancer Games and Frog God Games and produced with their cooperation to be compatible with The World of the Lost Lands campaign guide! It is the fourth of six adventures in the Aegis of Empires Adventure Path, with each adventure exploring hitherto unexplored areas of the Lost Lands with a combination of horror, intrigue, deadly danger, and the lure of ancient mysteries. While designed for use with the Lost Lands, these adventures are loosely connected rather than following a strictly controlled plotline, enabling you to easily place them into any campaign world. Your heroes can explore at their own pace to discover the secrets of antiquity or be consumed in their seeking as they brave the dark paths of the Aegis of Empires. Overview

Galaxy Ball Defender is a strategy game in which you have to point the direction of your ball using your mouse or the Xbox analog stick.

You move your shooter, that is, the Galaxy Galaxy navigator, in the right or in the left with only one real technique or the Roll to all directions.

Each full rotation is rewarded with a yellow energy ball, half turn is rewarded with a blue energy ball, and every wrong move you make is rewarded with a larger red energy ball. The more energy balls you gather the higher your score will be.
