What makes Photoshop Elements a good choice for users is the fact that it is one of the most widely used graphics editing software packages on the market. Another reason to use Photoshop Elements is the fact that it provides a better interface and less “clutter” than Photoshop. Any new user of Photoshop Elements will find that the program is extremely intuitive, easy to learn, and provides all of the features they need for editing images. Adobe Photoshop Elements has a very simple and easy to use interface. In Photoshop Elements, you can perform most of the editing tasks you might be used to. However, it is important to note that Photoshop Elements is not a fully-featured editing package with nearly as many options as the standard Photoshop. If you are new to photography, editing, and graphic design, Photoshop Elements is a great choice for your first graphic editor. This guide includes a step-by-step tutorial that will explain how to create, edit and save an image in Photoshop Elements. What Can You Create in Photoshop Elements? After installing the program, you will be presented with a welcome screen that explains how to use the program. The interface of the program is fairly intuitive. Some of the areas in the interface include: A navigation bar that allows you to get to different features 388ed7b0c7

The Magic Wand makes it easy to select an area of the image, such as a color or a shape. The Eraser and Erase Background tools can be used to wipe off unwanted areas of the image. The Hand tool can be used to manipulate the image, like moving and rotating it. The Pen tool can be used to draw vectors and text. Effect tools allow you to create transitions between images, add blurs and distortions, and even add fractals. Color tools help you change the colors in the image. Enhance and Reduce tools are useful for adjusting the images brightness and contrast. Layers are Photoshop's critical tool. You can organize the elements of an image into layers. This way you can add, remove, or modify an object without disturbing another layer. Selecting objects is sometimes difficult, and to help you select a specific object, the Info tool displays a helpful tooltip with information about the selected object. You can use the Zoom tool to make things bigger or smaller. Use the Move tool to manipulate the selected objects position. The Transform tool allows you to rotate, flip, scale, translate, and move the selected objects. Use the Layer and Layer Mask commands to add, remove, or modify layers and masks to edit the image. The Group tool lets you select multiple objects at once, and the Object menu lets you add or remove objects from groups. A variety of special effects can be applied to images in Photoshop. You can add a blur, a contrast, or a vignette effect. You can remove a portion of an image by using a mask. You can add a 3-D look to an image by using the 3-D command. You can put an image inside another image by using the Photoshop overlay feature. The Emboss effect is particularly useful for creating embossed effects, like embossed paper or even wood-look effects. You can also add a film effect to a still image. You can modify objects in an image by using the Filters menu. You can crop, sharpen, desaturate, or even change the orientation of an image. Photoshop has many text-editing tools, including a font panel, a font palette, a marquee, and a text tool. You can create a path, an object, or even a character, by using the Pen tool, and you can edit path, object, and character styles. You can use the

Q: Why I get pop up error on page load, but not when all chart is loaded? I have a code where the pop up message appears on page load. But when all the chart is loaded, the pop up message does not show.

```
$(document).ready(function () { $.get('@Url.Action("GetDataBarsCount", "Cars")', function (result) { var data = result; var chart = new Chart(document.getElementById("ChartBarsCount").getContext("2d")).Bar(data); new Chart(document.getElementById("ChartBarsCount").getContext("2d")).Bar(data); alert("it is"); }); });
```

The problem occurs on this line: `var chart = new Chart(document.getElementById("ChartBarsCount").getContext("2d")).Bar(data);` I got it from here: When I stop the code on this line, the pop up message appears. The function is not working when the data is not loaded at all. So I cannot load it every time.

A: Your problem is that you are using a jQuery selector (`#ChartBarsCount`) for an on-page element. This is not valid. In your case, you will need to use `document.getElementById("ChartBarsCount")`, and you will need to move your `alert()` statement to the callback for your AJAX request:

```
$(document).ready(function () { $.get('@Url.Action("GetData
