What's new:

Yet (Bored to Death: Season 2, Episode 5) I should have felt bad about not properly tagging my ranting before, but I didn't really think about it this time around. But boy was it a "do not fly with Khadafy" kind of episode on Ra's Al Ghul's personal plane. Movie Thoughts: Ratings are based off of reviews and comments from myself and other movies at the time the episode aired. 86% – Liked it 12% – Didn't like it 2% – I hated it What a shitty, shitty movie! I wish the previews showed more, "ohhh, this looks like a comedy. We're gonna watch it and laugh" and less, "ohhh, this looks like the definition of a shitty movie. I'm going to sit through this and watch things happen that made me wanna tear my own face off, watch my beating heart while eating it." That is all. So,

that's what happened. -This was not a premiere episode of a show. -The episode was mostly uninteresting to me, and I watched it out of a sense of duty. -I wish things started more in the beginning, but it was half-way through the movie that I realized this was where we needed to be. -Didn't care much about the "original cast", except for Christopher Reeve, because I didn't care enough. -The movie was just complete garbage. -Major spoiler: Although "Random 94 year old drop dead of a heart attack in the shower" is what ends it. But what a way to go out! -I don't really think this is how this guy died. Comments: 1. The only negative things I can say about these reviews are to say "while" they suck. From what I've seen of Bored to Death and other great television shows like Murphy Brown and The Simpsons, this movie is actually fairly enjoyable to even if it's not the best. Can't help it, maybe I just like a good sports story. 2. The Jonathan Ames intermission was probably much longer than it was due to time constraints, but

Website: [link] I hope you like the game and i am waiting for lots of reviews A: It feels very fair, for the price. You're play looks quite good, and it's the only FPS with a sort of old-school look. If you consider to try some other game at the same price as this one, don't fall for the "look" of the game, it's not very beautiful, and can be seen as a whole. There isn't any leaderboard, or multiplayer. If you don't read the ads, you'll see. (PS: I've play this game 5 minutes, and i lost my life, and saw nothing to tell me that i had to play it) Q: How to get the ID of all currently selected UICollectionViewCell I can't seem to find this anywhere. Is there a way to get the ID of the UICollectionViewCell? A: if your collectionView has only one section and you want to get the indexPath of the selected UICollectionViewCell, you can simply go for indexPath.section with indexPath.row to get your cell. For example: let currentCell = yourCollectionView.cellForItem(at: indexPath) print("cell id = \(currentCell!.ID)") or you can simply check if the indexPath.section = section. If you want to check on more than one section, you have to get the cell from the collectionView. let section = Int(indexPath.section) var currentCell : UICollectionViewCell? yourCollectionView.cellForItem(at: indexPath)?.reload() currentCell = yourCollectionView.cellForItem(at: indexPath)?.reload() print("cell id = \(currentCell!.ID)") Note that this will reload the current cell, so keep this in mind. If you only

need to store the data on the cell and you don't need to reload it, it might not make sense to make it optional. It sounds kind of funny that she has a last name that is similar to her first name.

Recent reports indicated that the Addition "Crescent Edge" appeared on "DYNASTY WARRIORS 9: Ancient Gods" for a very short period of time. Some users were lucky to get it and some did not. And why are some of the blogs announcing this being fud?

To my opinion, it may be due to the fact that this is pretty much a Chinese only software but to be quite frank, every user who couldn't get the weapon has been searching for it for a long long time. And if there are some Chinese blogs mentioning this, it doesn't mean that everything is 100% sure to be a fake news, because there are still many Chinese users who might have got this bundle pack but didn't want to made the giveaway, and only the lucky user can get it. So, the only answer for this is to give it to those non-Chinese users who actually didn't get it.
