How to convert Windows Server 2012 R2 Standard Evaluation to full version:1) Open cmd as administrator 2) Windows Server 2012 R2 Standard Evaluation cannot open the exe file I am trying to open a file with cmd. I go into the directory and into the folder. I get an error message: "Error: cannot run cmd.exe. You do not have permission to access this object." How can I open the file on this computer? I can open it with any other program. This is a user error, not a problem with Windows Server. I tried to run this on my XP... but without success. I could not change the permissions. I tried this at work, on Windows 7, on my laptop, on Windows XP SP2 and on my home computer. I tried copying the folder and restoring it with a new one, just to try it again, and got an error: "You do not have permission to perform this operation." I tried logging in as administrator, administrator and user account. I can't log in as administrator. I'm getting this error message: "Your password is incorrect. Please make sure you are typing your password correctly and try again." I was using Microsoft Word 2013 and tried to log in as an administrator and now I can't access my account. The administrator account is set up to work with Word and MS Excel 2013. The problem is that you are using Word 2013, not 2011. Microsoft Office. To log in as an administrator, you need to open the Security tab and click Advanced Security Options. Then select "Login Options." If you want to change your password, click "Change my password." Then enter your old password and click "Change" and then "OK." When you see the "Password" window, click "Apply" and then "OK." Enter the password you want to change to and click "OK." You will see the "Password" window. Click "Change" and then "OK." You will see a new "Change Password" option, and then "OK." You will then see "Current Password" and then "Change Password" at the bottom. When you see "New Password" you will be prompted to enter the new password twice. "OK" will display "New Password" again. You will now see "Save Changes." You will see the new password and at the bottom you will see "Save Changes." You will see "Password" again. And you will see "OK." You'll see the new "Change Password" option, and then you'll see "OK." Then you'll see "Current Password" and at the bottom you'll see "Change Password." When you see "New Password" you will be prompted to enter a new password twice. When you do, click "Change Password" again. To confirm the new password, click "OK." You can use your old password to edit if you want. Then you can verify and confirm all your settings. You can continue with the settings by clicking Next. You will then see "Log in with your Facebook account." You can click "Not Now" below. If you are not logged into Facebook, click "Log out of Facebook." You will then see "Log in to Facebook."

Donald Trump, who has used both media appearances and stump speeches in recent days to assail the FBI and deep state officials for spying on his campaign, is now calling for everyone to speak up. "I'll tell you what, folks, I think this is a tremendous example of people wanting to get involved in this process," Trump said of these disclosures. "I think it's a great thing. I think it's a great thing for the country, and I think it's a great thing for the world, frankly." WATCH: Emphasizing that "it's not us, it's the FBI," Trump said, "c6a93da74d
