Casper.v7.0.1801-DOA .rar

casper 0.87 finally arrives. this is an updated version of the original casper 0.7 released back in april, 2016, and builds on fixes since. it runs on linux, bsd, macos, and windows. this release has several fixes and some new features. it can currently only download files from one site at a time due to the curl multi interface. the date at the start of the file names all the files with a corresponding date. each of the 6 unique downloads has its own date. these days of the year are 2013.04.14, 2013.30, 2013.05.07, 2013.23, 2013.06. additionally, the ascii files all begin with a date as well. each one is 2013.14.20 or 2013.20. so many people faveing and raving, like right now the forum is feeling like the "all planets aligned" moment and i want to make sure that this is a good thing, so for me i'm making a few changes to the download and making it an iso 1) there will be no option for an update. (this may be a problem until casper can be updated) 2) when the full version is released i will make an iso with the full updated version. 3) the iso will be a bit shorter so that we'll be a bit more able to upgrade (if there are problems) 4) the file size will be slightly larger and i will use a new dat file signature so that the ilosebette person will not be able to track us down. al..casper.v7.0.1801-doa.rar casper - cios - linux -
