Verdin Singing Tower Manual

the majority of verdin clocks are completely weatherproof and carry the underwriters laboratories listing #863 for timepieces or timekeeping devices having passed temperature, dielectric voltage withstand insulation resistance, rain, and impact tests. all components and internal wiring are compliant with ul requirements, which is unique in our industry. every time we change as much as a screw in one of our clocks this listing must be updated. this listing is unique to our industry. visit www.ul.com for more information. as a result of technological advancements, the carillon system is now available in a wider range of bells and digital technology. recent innovations in the carillon world include automatic tuning and improved tuning stability. the carillon system is also much easier to operate than traditional carillons because it uses a digital control system. this allows a carillon to be played by a keyboard on a computer, or to control a chime group. there are now many different types of carillons, including manual carillons, pneumatic carillons, electro-pneumatic carillons, digital carillons, and electronic carillons. the bell tower has two public elevators that let you reach the top of the carillon at no cost. one is a general-use, public elevator. the other is an accessibility elevator, which holds only a few visitors and is reserved for the handicapped. the bell tower is accessible by elevator from the south side of the church at the base of the tower and from the north side of the church at the bell room. accessible elevators are conveniently located on both sides of the church allowing easy access to the bell room. 5ec8ef588b
