the key allows you to remove the activation bar and lock screen and unlock the windows 7 license. you may be unaware that activation is required to use windows 7 as it is not activated out of the box. after activation you may be able to use the programs that you paid for. the activation bar prevents the installation of new programs, which means you cannot simply install a new program and expect it to be used in windows 7. if you install a program with a non-genuine version, windows 7 will not load and the file will not be recognized by the operating system. this is because windows 7 is not activated, so it will not detect the file. the serial key is only valid for windows 7 ultimate, which is available for both 32 bit and 64 bit systems. if you download the wrong key, windows 7 will not function properly. you will also be unable to use programs that you have already purchased. in windows vista, some areas of the user interface have undergone a major redesign. the start menu is now a single pane, which contains a list of tiles and a list of application shortcuts. tiles are arranged in a list, which can be sorted by name or date accessed. the start menu is not always available; it can be displayed by pressing the windows logo key plus the spacebar. the user can also display the start menu by pressing the windows logo key plus the ctrl key. the windows logo key is located between the alt and ctrl keys. the taskbar has been redesigned to be more translucent in windows 7. taskbar buttons are enabled by default, and can be hidden when they are not needed. the user can drag the bottom edge of the taskbar up to change its size.
