The Preview pane lets you control the opacity of the tools you use in order to get a sense of the effect on individual layers. The Vibrance and Saturation tools can be pulled up or down using the new controls in the tool window. For those who may rarely use the Select tool, the Filter menu has been updated so that you can select from more options, such as the list of brightness, contrast, saturation, color, and position. The Filter menu also has a new Quick Filter option. In earlier versions, you could get the Proximity tool to zoom directly into the object it was clicking. In the new edition, you can tweak how the tool zooms in and out. The distortions add a three-dimensional look to your image, and you can also create the type of distortion you want with a set of buttons.

Meanwhile, Adobe is pushing the power of Content-Aware resizing, with a new feature that resizes a photo or content without losing its details by reconstructing the original art from pixel measurements taken from the image. Deep focus technology is also being introduced, making every photograph look like a miniature image on a high definition tv. Check it out: Adobe Photoshop Elements is finally available in a full macOS app. Adobe plans to turn this 'app' into a true 'app', one of many that can be saved to the Mac App Store. The reality of this happening isn't clear yet, but it's a wonderfully good step forward. You can see some of the early screenshots here: Photoshop Elements for macOS preview. It's only available in English at present. In this delightful new short film, Photoshop's product manager, Janet Hsu, lets you in on a bit of the magic behind the scenes of the software. This handsomely animated video finds Hsu explaining in detail how the software works. For something so technical, it's a beautiful little video and explains Photoshop's uses and features in a very accessible way. There are two main smart adjustments that come with the new addition of Adobe Sensei — vignette and Posterize. Together, these two tools cover more than 90 percent of the edge adjustment needs of any creative person:

- Reduce more than 90 percent of the edge adjustment needs of any creative person.
- Adjust the brightness, contrast, and color of the entire image.
