If you see a preview side by side the other versions, it will look familiar in Photoshop CS5. It's indistinguishable from previous versions, almost. The biggest change is that Photoshop CS5 has a new task bar. Now, everything you do in Photoshop will be stored in this task bar, which takes up space in the layers panel. You can click on it to see a panel containing all your open documents, your open Photoshop files (PSD, PSB, PSM, EPS, PSP, DPP, and MD) and any other files and supports that are open in the Editor, plus other links (the Filter Effects panel, the Krita plug-in developer's tools, menus, etc.). The main Photoshop window is in a different area, shown on the right-hand side. The folder panel is now above the Adobe Bridge's "your stuff" section and has been changed from a conventional side-by-side preview to something a bit more like a single column one. In the lessons, there is a tab for lesson #1. that lets you jump directly to lesson #1. The new version's first tutorial is CS5 Review. You can purchase the full tutorial or individual lessons, mostly Photoshop, Photoshop CS5 and Photo Express. The biggest negative for me as a Photoshop user is the new price structure. Photoshop CS5 is now $599, $299, or $199 for the three annual subscription options. Photographers will know why this new price is too high, and even professional photographers, I'm sure, will agree this is too expensive. I haven't used the cheaper plan, but it looks pretty good to me, way less price than the old plan.
