Adobe Photoshop Lightroom has replaced Adobe Photoshop Fix as the app for correcting red eye and other common blemishes. This new app has eight fixed-point versions so users can choose the best one for each photo. In addition to software-specific corrections, Lightroom has a long list of features that make it a powerful asset-management tool for large inventories, including several automatic workflow features. Adobe Photoshop Fix overhauled the whole program, so you now have two applications when you need it. It still acts as a one-stop, portable solution for minor issues and image corruption. But with new toolbars and a refined user interface, it's now a worthy alternative to Adobe Photoshop. The more you use the two, the closer Photoshop will be in your workflow. Adobe has also announced that it plans to discontinue CS4 and earlier versions of Photoshop in lieu of the free and subscription-based cloud-based applications, namely Photoshop CC and Photoshop Lightroom CC.
